Forecast for Monday 26 Apr 2021

Weather: Some clear spells overnight but increasing cloudy by dawn. After daybreak it will become quite cloudy with rain spreading south across the ranges, this will turn increasingly wintry during the afternoon on the munro tops. Rain and sleet will become more showery during the afternoon with some brighter interludes but also some quite heavy outbreaks at times.

Chance of cloud free mountain/hill tops above 800m: 90% falling to 60% by evening with cloud increasing and lowering in rain, sleet and snow outbreaks.

Visibility: During the morning visibility will generally be good however as the rain and sleet moves south conditions will deteriorate and visibility will be moderate or poor in outbreaks of rain and sleet. Cloud bases will fall below the summits to around 500m, possibly lower at times on more exposed tops. Cloud may lift for a time later as precipitation becomes more showery but will fall again in heavier showers.

Met Office Aberdeen Meteorologist's View
Freezing level falling steadily during the day and feeling quite chilly by evening in northerly winds.

Forecast for Tuesday 27 Apr 2021
Weather: Outbreaks of sleet and snow overnight will continue during the day, especially on more northerly ranges, some drier spells are likely during the afternoon and evening. Showers quite blustery in the strong northeasterly winds and feeling very cold on the hills.

Maximum wind: Northeasterly 15-20mph with gusts 25mph.

Chance of cloud free mountain/hill tops above 800m: 40%, cloud will lift a little outwith showers especially later in the day.

Visibility: Quite poor visibility throughout the day especially on more northerly hills with cloud bases broken above 500m. There will be some improvement by late afternoon. Further west and south will see some brighter spells and cloud may break here at times.

Temperature: **Glens:** Plus 4 rising to plus 7 Celsius.
At 800m: Plus 2 falling to minus 2 Celsius.
Freezing level: 1000m falling to 700m.
